## Self assessment

I mainly worked on Task 2 with Sami. I worked with Lingyu in person on the harmonization, putting everyone's part together into one report. Kaiwei and Sami also joined the harmonization but remotely. I also uploaded my solution of Task 1 to my branch and wrote the README for the project.

## Peer assessments

**Kaiwei Fu.** He mainly worked on Task 1 with Lingyu and joined every discussion online and in person.

**Lingyu Wang.** He mainly worked on Task 1 with Kaiwei and met me in person to combine our parts into final report.

**Sami Pönkä.** He mainly worked on Task 2 with me and gave very useful comments.

The group worked well together. Everyone was active and responsible, online and in person. Everyone took responsibility for the final assignment, not just the parts mentioned above.
